### **DETAILED ACTION**

## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 14 – 17 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for an annular flange, does not reasonably provide enablement for an apertured flange. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

Claims 11 – 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With reference to claims 11 and 12, the applicant claims "a natural shape". This term has not been supported by the specification and it is unclear what the applicant intends to encompass with this term. Further, the use of the word "it" in line 2 of each claim renders the claims indefinite because it is not clear what "it" is being used to refer to. Correction is required.

## Allowable Subject Matter

Claims 1 – 10, 13 and 18 – 20 are allowed.
